

Foot Switches

APS1211-V0

Applications

Choose these switches for foot switch-operated machines such as shearing machines, spinning machines, spinning lathes, machine tools, wrapping machines, riveting machines, and riveting presses.

AutomationDirect stocks foot switches in these operational formats:

- **Free movement (momentary):**
Contact position follows pedal movement; actuated when the pedal is pushed down, released when pedal is in state of rest.
- **Foot switch locked in neutral position (safety anti-trip momentary):**
Same operation as above, after unlocking the pedal with the foot.
- **Foot switch latched in low position (maintained):**
Same operation as free movement, except that a state of rest is obtained only after pedal is unlatched.
